

OKR & KPI's

1 Primary Objective

Improve students' ability to critically challenge their own reasoning and produce academically rigorous arguments that can withstand credible opposition.

KR1

Bias & Assumption Recognition

- % of users who identify and document at least one previously unrecognized bias, logical fallacy, or unsupported assumption in their argument during a session

KR2

Reasoning-Based Argument Revision

- % of sessions that result in substantive revisions to claims, counterarguments, or evidence directly tied to identified opposition or logical gaps

KR3

Perceived Rigor & Defensibility Improvement

- Average user rating of how much their argument's rigor and defensibility improved after engaging with structured opposition

KR4

Opposition Readiness Confidence

- % of users reporting increased confidence that their argument can withstand credible opposing viewpoints prior to submission
