

You are designing the UI for a web application called **Second Brain**.

The product is a critical thinking tool for university students that challenges their reasoning, identifies bias, and generates opposition arguments.

Important Constraints

- Do NOT change the information architecture.
 - Do NOT change navigation or screen structure.
 - Use the existing screens and flows exactly as defined.
 - Only adjust visual styling, spacing, typography, and component design.
 - The interface must feel clean, minimal, and productivity-focused.
-

Overall Design Direction

Create a **clean, distraction-free academic interface** optimized for deep work and long writing sessions.

The interface should feel:

- Serious
- Structured
- Focused
- Professional
- Calm
- Not playful
- Not flashy
- Not trendy

Think: Notion meets a university research tool.

Visual Style Guidelines

Color Palette

- Background: very light gray or off-white (#F9FAFB or similar)

- Primary text: near-black (#111827)
- Secondary text: medium gray (#6B7280)
- Accent color: muted blue (#2563EB)
- Borders: light gray (#E5E7EB)
- Success/complete: subtle green (#16A34A)

Avoid:

- Bright neon colors
 - Heavy gradients
 - Strong shadows
 - Dark mode
 - Overly decorative elements
-

Typography

- Clean sans-serif font (Inter, SF Pro, or similar)
- Strong hierarchy using size and weight (not color)
- Large, confident page titles
- Clear section headings
- Body text optimized for reading long passages

No playful fonts.

Layout & Spacing

- Generous white space
- 8px grid system
- Clear section separation
- Thin dividers instead of heavy panels
- Minimal visual noise

The layout should support long writing sessions without fatigue.

Component Styling

Buttons:

- Rounded 6px corners
- Primary buttons filled with muted blue
- Secondary buttons outlined
- No heavy shadows

Tabs:

- Underline active state
- Simple horizontal tabs
- No pill-style or segmented controls

Inputs:

- Light border
- Subtle focus state
- No glow effects

Cards:

- Very subtle border
- No heavy elevation

Graphs:

- Thin line chart
- Minimal grid lines
- Muted accent color

Interaction Emphasis

Primary actions should be clearly visible but not aggressive:

- Start Session
- Begin
- Run Challenge
- Apply to Revision
- View Progress

They should stand out through placement and color, not animation or size exaggeration.

Emotional Tone

The interface should communicate:

“You are here to think deeply.”

Not:

“This is exciting tech.”

Not:

“This is playful.”

Not:

“This is intense.”

It should feel academically credible and calm.

Accessibility

- Maintain strong text contrast
 - Ensure readability at smaller screen sizes
 - Avoid relying on color alone for meaning
 - Use spacing and structure to improve scanability
-

Summary Instruction

Recreate the existing screens using a clean, minimal, productivity-focused aesthetic optimized for long academic writing sessions. Preserve structure and flow exactly as defined. Focus on clarity, whitespace, hierarchy, and restrained accent usage.
